PROJECTS

- **Caliber – AI Powered Fitness Coach (React.js, Node.js, PostgreSQL, Gemini API):**
 - Developed an AI fitness application with persistent memory for personalized training using workout and nutrition history.
 - Implemented retrieval augmented generation (RAG) to maintain user context across sessions, eliminating redundant data entry.
 - Optimized AI recommendations using domain specific prompt engineering and feedback loops.
- **ReVault – Encrypted Marketplace (React, Redux, WebCrypto API, AES-256-GCM, SHA-256):**
 - Engineered a secure marketplace for encrypted transfer of digital assets including event tickets, gaming accounts, and premium content.
 - Implemented end-to-end encryption using AES-256-GCM with RSA-OAEP key wrapping and SHA-256 integrity verification.
 - Built RSA-PSS digital signatures and an administrative audit dashboard for compliance monitoring and security event tracking.
- **Nudgr – Habit Coaching Platform (React, Node.js, Express, Auth.js, OpenAI API, Tailwind CSS):**
 - Developed a SaaS habit coaching platform using AI-generated nudges and gamification to build positive user behaviors.
 - Built a full-stack system with secure authentication, personalized dashboards, and real-time habit tracking workflows.
 - Integrated the OpenAI API to deliver context-aware nudges and behavioral recommendations based on user progress.
